

We are committed to educating graduates who are informed, engaged professionals and citizens. The knowledge and skills of the Educated Citizen are built on three integral components: the reflective individual, effective communicator and change agent. Students will develop habits of inquiry through the humanities, natural and applied sciences, and social sciences. Students will integrate these concepts with professional course work and apply them to challenges in the future. The courses listed below are specifically designed to meet these outcomes. "X" indicates a required course in the respective program of study.

Mid-Plains Community College
